Subject: Leviathan Mine - Geotechnical Comments to the LRWQCB Project Plans for Temporary Slide Repair
[170626 Geotech Cmts to LRWQCB Slope Repair Plans.pdf](#)

Gary and Scott,

Atlantic Richfield has reviewed the Lahontan Regional Water Quality Control Board's (LRWQCB) plans for stabilization and dewatering work on the Crusher Road Slope. We support and appreciate the LRWQCB's efforts to make these needed repairs. Because geotechnical stability in this area and the proposed repairs have the potential to affect Atlantic Richfield's Pond 4 operations, as well as surface water and groundwater conditions in areas where we are performing monitoring for the Remedial Investigation, Atlantic Richfield's geotechnical team performed a preliminary review of the LRWQCB's plans. We offer the attached comments and questions for U.S EPA's and the LRWQCB's consideration as the work proceeds. Atlantic Richfield will continue with implementation of its Hazardous Conditions Response Plan (submitted to U.S. EPA on May 3, 2017), including enforcement of the workforce exclusion zone, until the LRWQCB's stabilization work is complete and monitoring results confirm that the hazardous conditions have been abated.

If you have any questions or comments please contact Tony Brown at (657) 529-4537 or anthony.brown@bp.com.

Thanks,

Marc
